The Admiral's Objections to the Verdict of the Court.

WASHINGTON, Dec. 18.-Admiral Schley late this afternoon, through his counsel, presented to the Secretary of Navy his bill of exceptions to the findings of the majority of the Court of loquiry. The bill claims that the mathat Commodore Schley should have proceeded with the utmost despatch off Clenfuegos when there was no specificagiving the applicant an opportunity to furnish evidence on it. The fact that no place was mentioned on what to meeting the insurgents is regarded as a paramount reason why communication was not held with the insurgents. The bill takes up the testimony in detail, and argues that on almost every point the findings of the majority of following the same lines as the arguneys. Every conclusion in the finding of the court was taken up and negutive ly argued, and the court was criticised for not determining who was commander-in-chief in the Santiago battle The bill concludes with the statemen

The bill concludes with the statement that the proceedings of the majority of the court were irregular; that Admiral Schley's rights have been prejudiced, and his testimony in many particulars not considered, and that the evidence is absolutely insufficient to sustain the opinion which has been rendered, and that therefore a grave and irreparable injustice has been done Admiral Schley. Admiral Schley, through counsel, also has served notice that if Admiral Sampson objects to the finding of Admiral Dewey he will claim the right to be heard in reference to such objection.
